

Making the Clean Energy Package work for all

With its Clean Energy for All Europeans Package, the EU aims to be a global leader in the low carbon economy transition

BENEFITS

As US business in Europe, we have a unique stake as both investors and energy users

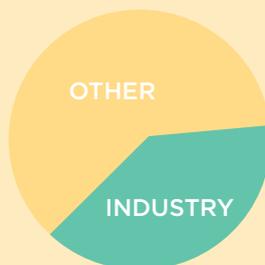

As energy users

OBJECTIVE

Ensure a cost-efficient transition to a low-carbon economy

DID YOU KNOW?

Industry represents 1/3 of total electricity consumption

RECOMMENDATIONS

Reward flexibility

by **creating a market for energy services**, which includes storage and demand management

Consider systems costs

to bring **both retail and industrial consumers to the centre** of the EU energy policy

Make capacity mechanisms temporary

regional, and **focused on securing energy supply** at minimal cost to the consumer

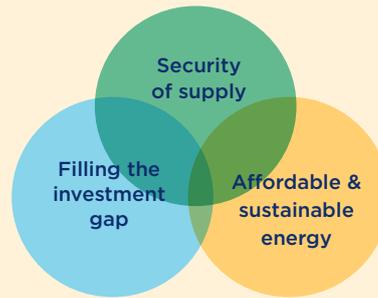

Reinforce cooperation

across Member States on energy policy

Making the Clean Energy Package work for all

With its Clean Energy for All Europeans Package, the EU aims to be a global leader in the low carbon economy transition

BENEFITS

As US business in Europe, we have a unique stake as both investors and energy users

As investors in Europe

OBJECTIVE

Secure the needed investments to bring the EU to the next level of decarbonisation

DID YOU KNOW?

US investment in Europe totalled more than €2 trillion in 2016

RECOMMENDATIONS

Produce and implement national 10-year plans

sharing these with the public, and **explicitly warning against retroactive changes**

Strengthen the carbon price signal

to create a **level playing field** for all technologies

Ensure clear price signals

coming from the free flow of energy, rather than a fragmented collection of national prices

Create market conditions

that encourage investors to **limit the risks of a project**, through long-term contracts like Power Purchase Agreements (PPA) in the US
