

# Clearing the hurdles for renewable energy in Europe

Removing obstacles to Power Purchase Agreements (PPAs) for renewables could help the private sector achieve the EU's 2030 targets, despite reduced public funding for renewables.

Questions?

EU corporate power purchasing could take us across the finish line but... **significant challenges remain**

Support corporate purchasing of renewable energy in the EU

## CHALLENGES

Reaching agreements on PPAs

## SOLUTIONS

Track progress to **remove administrative hurdles**

Develop **interconnection and market coupling** to support cross border PPAs

Increase **transparency and harmonisation** for issuing GOs

Support investment in infrastructure and storage and balancing mechanisms to better integrate renewable energy into the grid

Doubts about access to **Guarantees of Origin (GO)**

Administrative requirements make it more costly to develop renewables

PPAs  
Legally-tested, consistent contract structure

Renewable energy certificates
