

Consultation response

Feedback on the Platform's draft report on the Social Taxonomy

AmCham EU speaks for American companies committed to Europe on trade, investment and competitiveness issues. It aims to ensure a growth-orientated business and investment climate in Europe. AmCham EU facilitates the resolution of transatlantic issues that impact business and plays a role in creating better understanding of EU and US positions on business matters. Aggregate US investment in Europe totalled more than €3 trillion in 2020, directly supports more than 4.8 million jobs in Europe, and generates billions of euros annually in income, trade and research and development.

Call for feedback on the Platform on Sustainable Finance's draft report on social taxonomy

Fields marked with * are mandatory.

Introduction

Disclaimer:

This call for feedback is part of ongoing work by the <u>Platform on Sustainable Finance</u>, which was set up by the Commission to provide advice on the further development of the EU taxonomy framework.

This feedback process is not an official Commission consultation. The draft report produced by the Platform is not an official Commission document. Nothing in this feedback process commits the Commission nor does it preclude any policy outcomes.

In March 2018 the Commission published its <u>action plan: financing sustainable growth</u>, based on the advice of the <u>High Level Expert Group (HLEG)</u>. Action 1 of the Commission's action plan calls for the establishment of an EU classification system for sustainable activities, or taxonomy. The Commission followed through on this action by proposing a regulation for such a taxonomy. The <u>Taxonomy Regulation</u> was adopted by the co-legislators in June 2020. It establishes the basis for the <u>EU taxonomy</u> by setting out 4 overarching conditions that an economic activity has to meet in order to qualify as making a substantial contribution to environmental objectives.

Development of the EU taxonomy relies on extensive input from experts from across the economy and civil society. The <u>Platform on Sustainable Finance</u> plays a key role in enabling such cooperation by bringing together the best expertise on sustainability from the corporate and public sector, from industry as well as academia, civil society and the financial industry join forces.

While the work started with classifying environmentally sustainable activities, the need to better understand socially sustainable investments was acknowledged from the onset, and featured among the recommendations of the HLEG in 2 0 1 8 .

In October 2020, the Commission established the Platform for Sustainable Finance, and created with five working groups, including the <u>Subgroup on social taxonomy</u>, which was tasked to:

- 1. explore the extension of the taxonomy regulation to social topics
- 2. elaborate potential objectives of a social taxonomy
- 3. work out a structure of a social taxonomy
- 4. identify approaches to substantial contribution and 'do no significant harm' in the field of 'social'
- 5. reflect on governance, business ethics, anti-bribery and tax compliance
- 6. consider potentially harmful activities
- 7. suggest a relationship between a green and a social taxonomy

On 12 July 2021, the Platform published its first draft report on a proposal for a social taxonomy.

The report assesses the merits of a social taxonomy in addition to the environmental taxonomy, and explores possible avenues to complement the existing taxonomy. The report also proposes various objectives and sub-objectives for a social taxonomy, as well as possible approaches for defining "substantial contribution" and "do no significant harm" criteria. Finally, it develops two alternative models for articulating the social taxonomy with the environmental taxonomy.

Call for feedback

The Platform is inviting stakeholders to provide feedback on the draft report through this online questionnaire.

The deadline for providing feedback is Friday 27 August close of business.

In the online questionnaire, you will be asked to comment on certain aspects of the report and make suggestions.

Next steps

The Platform is still working on some important aspects of these questions and will proceed to develop its final report and final recommendations after considering the stakeholder input collected through this call for feedback.

The Platform will submit the final report with their advice to the Commission in autumn 2021. The Commission will analyse and consider the report in view of the continuous developing of the EU taxonomy, as anticipated in the new <u>sust</u> ainable finance strategy.

By the end of 2021, the Commission will publish a report on the provisions required for a social taxonomy, as required by the Taxonomy Regulation.

Please note: In order to ensure a fair and transparent consultation process only responses received through our online questionnaire will be taken into account and included in the report summarising the responses. Should you have a problem completing this questionnaire or if you require particular assistance, please contact <u>fisma-platform-sf@ec.europa.eu</u>.

Question 1.2 Which in your view are the main concerns about a social taxonomy?

Please select as many answers as you like

interference with	national	regulations	and social	partners'	autonomy
IIIICOTTOTOTOC WILL	i ilatioilai	rogalationic	aria cociai	partificio	aatononny

increasing administrative burden for companies

other

none

Please specify to what other concern(s) you refer in your answer to question 1.2:

1000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

AmCham EU believes that existing international frameworks (eg UNGPs) are working and that introducing an EU social taxonomy would be premature at this time. As per principles of better law making and the objectives of the sustainable finance agenda and EU Green Deal, the EU should focus on completing and rendering effective the environmental taxonomy and revised sustainability reporting framework. Extending the EU taxonomy into the social sphere would be disproportionate, particularly if based on sectoral exclusions. Whereas environmental objectives are based on science, social criteria are more difficult to define accurately or measure consistently. Defining new qualitative social criteria without clarity on the upcoming quantitative environmental criteria would make the taxonomy implementation highly complex. We support increased efforts to finalise the environmental EU taxonomy as a tool to guide sustainable investment and to improve comparable disclosure by companies in the CSRD.

Structure of the social taxonomy

The draft report suggests a structure for a social taxonomy distinguishing between a vertical and a horizontal dimension. The vertical dimension would focus on directing investments to activities that make products and services for basic human needs and for basic economic infrastructure more accessible, while the horizontal dimension would focus on human rights processes.

The objective linked to the vertical dimension of the social taxonomy would be to promote adequate living standards. This includes improving the accessibility of products and services for basic human needs such as water, food, housing, healthcare, education (including vocational training) as well as basic economic infrastructure including transport, Internet, clean electricity, financial inclusion.

The objective linked to the horizontal dimension would be to promote positive impacts and avoid and address negative impacts on affected stakeholder groups, namely by ensuring decent work, promoting consumer interests and enabling the creation of inclusive and sustainable communities.

Question 2. In your view, are there other objectives that should be considered in vertical or horizontal dimension?

Yes

- No
- Don't know / no opinion / not applicable

Please explain your answer to question 2:

1000 character(s) maximum

Please select as many answers as you like

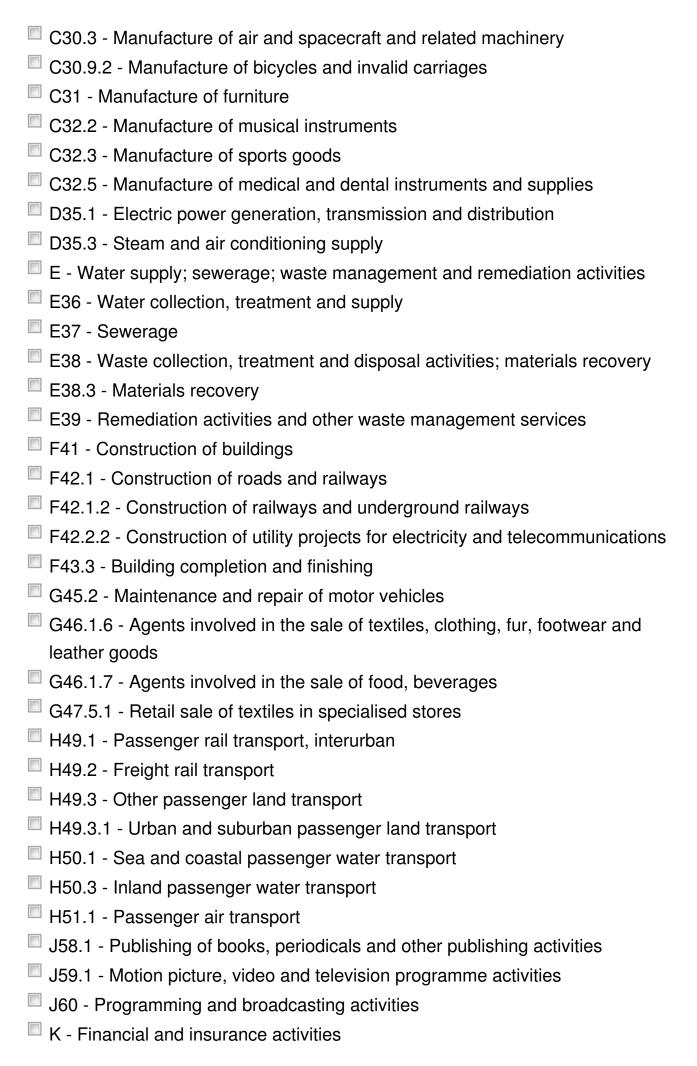

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

AmCham EU is not convinced by the utility of either the vertical or horizontal dimensions and is concerned about how these qualitative/subjective criteria would overlap with the work still being conducted on the more quantitative environmental taxonomy.

We believe that robust company governance, due diligence, reporting, data transparency, as well as cooperation on and commitments to international standards would provide a positive path to incorporating social responsibility and sustainable investment in the global economy. As proposed, the horizontal and vertical lines suggested risk introducing artificial classifications.

Question 3. Which of the following activities should in your view be covered in the vertical dimension (social products and services)?

A1 - Crop and animal production, A1.1 - Growing of non-perennial crops A1.2 - Growing of perennial crops A1.4 - Animal production A3 - Fishing and aquaculture C10 - Manufacture of food products C10.8.2 - Manufacture of cocoa, chocolate and sugar confectionery C10.8.3 - Processing of tea and coffee C10.8.6 - Manufacture of homogenised food preparations and dietetic food C13 - Manufacture of textiles C20.1.5 - Manufacture of fertilisers and nitrogen compounds C20.2 - Manufacture of pesticides and other agrochemical products C21 - Manufacture of basic pharmaceutical products and pharmaceutical preparations C23.3 - Manufacture of clay building materials C23.5 - Manufacture of cement, lime and plaster C25.2.1 - Manufacture of central heating radiators and boilers C30.1 - Building of ships and boats C30.2 - Manufacture of railway locomotives and rolling stock

	L68.2 - Renting and operating of own or leased real estate
	M71 - Architectural and engineering activities; technical testing and analysis
	M72.1.1 - Research and experimental development on biotechnology
	N77.1.1 - Renting and leasing of cars and light motor vehicles
	N77.2 - Renting and leasing of personal and household goods
	N78.1 - Activities of employment placement agencies
	N78.2 - Temporary employment agency activities
	N78.3 - Other human resources provision
	O84.1.2 - Regulation of the activities of providing health care, education,
	cultural services and other social services, excluding social security
	O84.2 - Provision of services to the community as a whole
	O84.2.4 - Public order and safety activities
	O84.2.5 - Fire service activities
	O84.3 - Compulsory social security activities
	P85.1 - Pre-primary education
	P85.2 - Primary education
	P85.2.0 - Primary education
	P85.3 - Secondary education
	P85.3.2 - Technical and vocational secondary education
	P85.4.2 - Tertiary education
	Q - Human health and social work activities
	Q86.1 - Hospital activities
	Q86.2 - Medical and dental practice activities
	Q87 - Residential care activities
	Q88 - Social work activities without accommodation
	Q88.9.1 - Child day-care activities
	Q88.9.9 - Other social work activities without accommodation n.e.c.
	R - Arts, entertainment and recreation
	R93.1.3 - Fitness facilities
	S95 - Repair of computers and personal and household goods
	S96.0.4 - Physical well-being activities
1	Other

Please specify to what other activity(ies) you refer in your answer to question 3:

including spaces	and line breaks	i.e. stricter than	the MS Word	characters	counting method
------------------	-----------------	--------------------	-------------	------------	-----------------

See answer to question 2

Question 4. Do you agree with the approach that the objectives in the horizontal dimension, which focusses on processes in companies such as the due diligence process for respecting human rights, would likely necessitate inclusion of criteria targeting economic entities in addition to criteria targeting economic activities?

- Yes
- No
- Don't know / no opinion / not applicable

Please explain your answer to question 4:

1000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

See answer to question 2

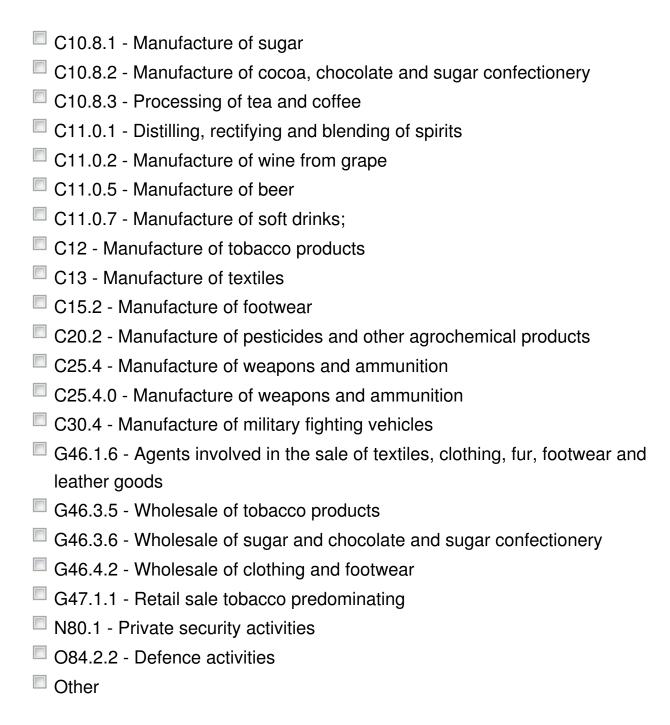

Harmful activities

The report envisages harmful activities as those which are fundamentally and under all circumstances opposed to the objectives suggested in this proposal for a social taxonomy. There would be two sources on which this rationale can be build: internationally agreed conventions, e.g. on certain kinds of weapons & detrimental effects of certain activities, for example on health.

Question 5. Based on these assumptions, would you consider certain of the following activities as 'socially harmful'?

Please select as many answers as you like

- A1.1.5 Growing of tobacco
- B5 Mining of coal and lignite
- B7 Mining of metal or iron ores
- B9 Mining support service activities
- B9.1 Support activities for petroleum and natural gas extraction

Governance objectives

Question 6. Sustainability linked remuneration is already widely applied in sustainable investment. In your view, would executive remuneration linked to environmental and social factors in line with companies' own targets, therefore also be a suitable criterion in a social classification tool such as the social taxonomy?

- Yes
- No
- Don't know / no opinion / not applicable

Please explain your answer to question 6:

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

A director's fiduciary duty is to promote the company's success, which is its long-term increase in value. For this long-term success, directors must act in good faith and consider many factors, including the interests of as many stakeholders as possible.

Since long-term value necessitates assessing ESG risks and opportunities, board members are best-placed to define company interest and the metrics for executive remuneration. Companies must also be responsive to both their investors' ESG priorities as well as their other interests; it would be more effective to produce guidelines on how best to implement the current regulation.

Question 7. The report envisages governance objectives and analyses a certain number of governance topics. Please select the governance topics which in your view should be covered:

Please select as many answers as you like

	Sustainability competencies in the highest governance body
	Diversity of the highest governance body (gender, skillset, experience,
	background), including employee participation.
	Transparent and non-aggressive tax planning
	Diversity in senior management (gender, skillset, experience, background)
	Executive remuneration linked to environmental and social factors in line with
	companies' own targets
	Anti-bribery and anti-corruption
	Responsible auditing
	Responsible lobbying and political engagement
1	Other

Please specify to what other governance topic(s) you refer in your answer to question 7:

1000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

Disclosure requirements included in the upcoming CSRD and CSG legislation should be proportionate and complementary to existing international principles without an additional layer of reporting and administrative burden that could negatively impact the efforts of companies to measure, address, and mitigate ESG risks.

The forthcoming CSRD and CSG envision robust disclosure and due diligence requirements. We would recommend that the EU's approach to aim for consistency with the extensive standardisation work already done at international level, such as in the OECD.

Models for linking an environmental and a social taxonomy

The report suggests two models for linking an environmental and a social taxonomy

- Model 1: The social and an environmental taxonomy would only be related through social and environmental minimum safeguards with governance safeguards being valid for both. The <u>UN guiding principles</u> would serve as minimum safeguards for the environmental part, while the environmental part of the <u>OECD guidelines</u> would serve as environmental minimum safeguards for the social part. The downside would be thin social and environmental criteria in the respective other part of the taxonomy
- Model 2: There would be one taxonomy with a list of social and environmental objectives and DNSH criteria. It would essentially be one system with the same detailed 'do no significant harm' criteria for the social and environmental objectives. The downside would be that there would be fewer activities that would meet both social and environmental 'do no significant harm' criteria

Question 8. Which model for extending the taxonomy to social objectives do you prefer?

- Model 1
- Model 2
- Don't know / no opinion / not applicable

Please explain your answer to question 8:

1000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

We believe that neither model strikes an appropriate balance with the general principles of Better Regulation. There is significant risk of overlap between the environmental taxonomy, the suggested social taxonomy, and existing EU environmental, product, and social legislation.

Extending the EU taxonomy into the social sphere would be disproportionate, particularly if based on sectoral exclusions. Whereas environmental objectives are based on science, social criteria are more difficult to define accurately or measure consistently. Defining new qualitative social criteria without clarity on the upcoming quantitative environmental criteria would make taxonomy implementation highly complex.

General expectation from the social taxonomy

Question 9. What do you expect from a social taxonomy?

5000 character(s) maximum

including spaces and line breaks, i.e. stricter than the MS Word characters counting method.

In line with the principles of better law making and Better Regulation, the EU should first focus on completing and rendering effective the environmental taxonomy in line with the main objectives of the sustainable finance agenda and the EU Green Deal.

We thus support increased efforts to finalize and implement the environmental EU taxonomy and efforts under the CSRD to improve the comparability of environmental, social and governance disclosure by companies.

Additional information

Should you wish to provide additional information (e.g. a position paper, report) or raise specific points not covered by the questionnaire, you can upload your additional document(s) below. Please make sure you do not include any personal data in the file you upload if you want to remain anonymous.

The maximum file size is 1 MB.

You can upload several files.

Only files of the type pdf,txt,doc,docx,odt,rtf are allowed
